The Role of Central Banks in Assisting Regional Economic Policy Making

Bank of Korea Conference:
Central Bank Regional Economic Surveys:
Experiences and Challenges

Randall W. Eberts
W.E. Upjohn Institute for Employment Research

March 17, 2014
Role of Central Banks:
- Ensure price stability
- Ensure financial stability
- Promote full employment (in case of US)

Since national economies are not monolithic, sound monetary policy can be well served by:
- Identifying regional economies
- Understanding regional economic dynamics
- Closely monitoring regional economic conditions

Can help detect early warning signs of important changes in the economy

Similar information can help inform regional economic policy
Bottom-Up Data Collection

Central Bank Structure

Bank of Korea

Monetary Policy Committee

- Governor
- Senior Deputy Governor
- Deputy Governors
- Departments in Head Office (14)
- Domestic Branches (16)
- Auditor
- Audit Department

Regional outreach
Relationships with Regional Entities

• Many regional Fed banks have developed strong relationships with local organizations and regional governments
  – State and local governments
  – Economic development organizations
  – Workforce development agencies
  – Regional partnership initiatives

• Regional Fed bank research departments may assist these organizations through their research on regional issues, either in general or customized

• Bank support of regional initiatives lends credence to such efforts
Regional Fed Bank Research

• Each regional Fed bank has an independent research department and many have an active regional component

• Some have a distinct identity with respect to the regional research they conduct
  – Kansas City focuses on rural issues
  – Dallas focuses on energy
  – Cleveland and Chicago on industrial sector

• Regional research may focus on topics:
  • Employment and unemployment
  • Education
  • Housing
  • Crime rates
  • Productivity
  • Income inequality
  • Wages
  • More

Information Needed to Help Promote Regional Economic Policy Making

- Variety of organizations and government entities are involved in regional economic policy making
  - State and local governments (taxes, incentives)
  - Economic development organizations (site selection, attraction, partnerships)
  - Workforce development organizations (training, labor exchange)
  - Educational institutions (training, education)
- Organizations may work independently or in partnerships
- Process of regional economic policy making is interactive and continuous
Cycle of Regional Policy Making

1. Detect Problem/Opportunity
2. Detailed Diagnostic Analysis
3. Develop Strategic Plan/Identify Initiatives
4. Evaluate Initiative
5. Dashboard

The cycle repeats.
Central Bank’s Contribution

• Indexes can serve as components of regional dashboard indicators

• Research can further our understanding of the drivers of regional economic growth
  – Research serves the dual purpose of informing national monetary policy as well as informing regional policy

• Research departments may also work closely with regional organizations to conduct research customized to their needs
  – Such a relationship may be best established when a bank official sits on an organization’s board or the bank partners with a regional initiative
Conclusions

• Golden Book provides a means to monitor regional economic conditions and detect early signs of changes in the economy, at both regional and national levels
• Golden Book collects information needed for sound policy decisions at both regional and national levels
• Additional regional information can be useful for both regional and national policy making
• Regional research that identifies the drivers of economic development and that highlights differences and similarities across regions can well serve both levels of policy making.
